APRESENTAÇÃO

Olá!

Sou o professor Rodrigo Perni e, com imensa satisfação, serei o seu analista do Passo Estratégico! Para que você conheça um pouco sobre mim segue um resumo de nossa experiência profissional, acadêmica e como concursado:

Rodrigo Perni

**Auditor – Fiscal da Receita Federal do Brasil;*

** Coach do Estratégia Concursos;*

** Responsável pela elaboração e análise estatística do Passo Estratégico de Arquivologia, Recurso de Administração de Materiais e Inglês;*

** Formado em Administração de Empresas e*

** Aprovado no concurso do ano de 2005, na 21ª posição na 2ª Região Fiscal no concurso para Auditor-Fiscal da Receita Federal do Brasil.*

Estou extremamente feliz de ter a oportunidade de trabalhar na equipe do "Passo", porque tenho convicção de que nossos relatórios e simulados proporcionarão uma preparação diferenciada aos nossos alunos!

O QUE É O PASSO ESTRATÉGICO?

Serão acrescentadas diversas questões das principais bancas que elaboram concursos públicos nos cadernos de exercícios disponibilizados no final do curso.

O Passo Estratégico é um material escrito e enxuto que possui dois objetivos principais:

- a) orientar revisões eficientes;
- b) destacar os pontos mais importantes e prováveis de serem cobrados na prova.

Assim, o Passo Estratégico pode ser utilizado tanto para turbinar as revisões dos alunos mais adiantados nas matérias, quanto para maximizar o resultado na reta final de estudos por parte dos alunos que não conseguirão estudar todo o conteúdo do curso regular.

Em ambas as formas de utilização, como regra, o aluno precisa utilizar o Passo Estratégico em conjunto com um curso regular completo.

Isso porque nossa didática é direcionada ao aluno que já possui uma base do conteúdo.

Assim, se você vai utilizar o Passo Estratégico:

- a) como método de revisão, você precisará de seu curso completo para realizar as leituras indicadas no próprio Passo Estratégico, em complemento ao conteúdo entregue diretamente em nossos relatórios;
- b) como material de reta final, você precisará de seu curso completo para buscar maiores esclarecimentos sobre alguns pontos do conteúdo que, em nosso relatório, foram eventualmente expostos utilizando uma didática mais avançada que a sua capacidade de compreensão, em razão do seu nível de conhecimento do assunto.

Seu cantinho de estudos famoso!

Poste uma foto do seu cantinho de estudos nos stories do Instagram e nos marque:

[@passoestrategico](https://www.instagram.com/passoestrategico)

Vamos repostar sua foto no nosso perfil para que ele fique famoso entre milhares de concurseiros!

ANÁLISE ESTATÍSTICA

Inicialmente, convém destacar os percentuais de incidência das questões de Inglês nas provas elaboradas pela banca QUADRIX.

Lembrando, quanto maior o percentual de cobrança de um dado assunto, maior sua importância:

Assunto	Grau de incidência em concursos anteriores
<u>Interpretação de Textos (compreensão)</u>	36.88%
<u>Semântica e Significado de Vocábulos (Semantics)</u>	23.26%
<u>Gramática (inglês)</u>	20.00%

ROTEIRO DE REVISÃO E PONTOS DO ASSUNTO QUE MERECEM DESTAQUE

A ideia desta seção é apresentar um roteiro para que você realize uma revisão completa do assunto e, ao mesmo tempo, destacar aspectos do conteúdo que merecem atenção.

ATENÇÃO!!! Serão disponibilizados exercícios das principais bancas que elaboram concursos públicos nos cadernos de questões ao final do curso.

Obs: Esta é uma aula introdutória que apresenta dicas de como ensinar técnicas de leitura dinâmica e buscar algo característico para responder uma determinada questão.

Para revisar e ficar bem preparado no assunto, você precisa, basicamente, seguir os passos a seguir:

1 - Saiba utilizar as técnicas Skimming e Scanning.

2 - O **Skimming** é a leitura dinâmica para destacar os aspectos principais do texto, sem se preocupar com os detalhes.

3 - **Scanning** é ter como objetivo achar algo característico, singular, exclusivo para responder uma determinada questão.

4 - Atenção às técnicas utilizadas no **Skimming** e **Scanning**:

SKIMMING	SCANNING
• FAST READING	• VOCABULARY SELECTIVITY

- CONCENTRATION/FOCUS
 - GENERAL TEXT IDEA
 - TEXT GOALS
- SUBJECT INFORMATION

- KEEP AN EYE ON THE TEXT
 - COGNATS: HELPERS
 - SPECIFIC DETAILS
 - VISUAL CONTACT

5 - Palavras **cognatas** são aquelas que se assemelham a palavras em português. E, essas semelhanças ortográficas, ajudam você a fazer suas leituras.

6 - **False Cognates** ou **False Friends**, aparecem muito nas provas e são palavras que se diferem completamente no significado, apesar de serem similares na ortografia. Vejamos outros exemplos:

- ACTUALLY = de fato/na verdade (não é atualmente, que seria NOWADAYS)
- FABRIC = tecido (não é fábrica, que seria FACTORY)
- PREJUDICE = preconceito (não é prejudicial, que seria HARMFUL)
- COLLEGE = faculdade (não é escola, que seria SCHOOL)
- PRETEND = fingir (não é pretender, que seria TO INTEND)

7 - Para expressar uma ação no presente, em português, cada sujeito usado (eu, ela, os homens etc.) há uma terminação diferente. Usando o verbo trabalhar, que faz parte dos verbos da primeira conjugação – terminados em -ar, como olhar, falar etc. – e a raiz do verbo trabalhar, a parte que não muda, é trabalh-, certo?

7.1 - Atenção: Em inglês o verbo fica igual para todo e qualquer sujeito, adicionando apenas a letra -s, -es ou -ies quando o sujeito é singular, ou seja, quando uma única pessoa pratica a ação. Vejamos com a ajuda de um esquema:

EM PORTUGUÊS:

- Eu trabalho
- Tu trabalhas
- Ele/Ela trabalha
- Nós trabalhamos
- Vós trabalhais

EM INGLÊS:

- I work
- You work
- He/She/It works
- We work
- You work

- Eles trabalham

- They work

7.2 - O verbo trabalhar no passado, é "worked" qualquer sujeito. Veja abaixo:

EM PORTUGUÊS:

- Eu trabalhei
- Tu trabalhaste
- Ele/Ela trabalhou
- Nós trabalhamos
- Vós trabalhais
- Eles trabalharam

EM INGLÊS:

- I worked
- You worked
- He/She/It worked
- We worked
- You worked
- They worked

8 - Existem verbos irregulares na língua inglesa, Por exemplo, o verbo escrever, "write", que, ao invés de adicionar -ed no final, como a maioria dos verbos em inglês, troca-se uma das letras, por ser irregular.), escreve-se "wrote" para qualquer sujeito. Veja outro esquema para ficar ainda mais claro.

EM PORTUGUÊS:

- Eu escrevi
- Tu escreveste
- Ele/Ela escreveu
- Nós escrevemos
- Vós escreveis
- Eles escreveram

EM INGLÊS:

- I wrote
- You wrote
- He/She/It wrote
- We wrote
- You wrote
- They wrote

9 - As expressões idiomáticas (idioms), aparecem com naturalidade e enriquecem a comunicação textual. Veja mais alguns exemplos de expressões idiomáticas:

IDIOM
(EXPRESSION IDIOMATIC)

"Estamos quites"
"WE ARE EVEN"

@teacherandreabelo

IDIOM
(EXPRESSION IDIOMATIC)

"Fica para a próxima"
"MAYBE SOME OTHER TIME"

@teacherandreabelo

IDIOM
(EXPRESSION IDIOMATIC)

"Entre a cruz e a espada"
"BETWEEN A ROCK AND A HARD PLACE"

@teacherandreabelo

IDIOM
(EXPRESSION IDIOMATIC)

"Beco sem saída"
"IT'S A CATCH 22"

@teacherandreabelo

IDIOM
(EXPRESSION IDIOMATIC)

"No dia de São Nunca"
"WHEN HELL FREEZES OVER"

@teacherandreabelo

IDIOM
(EXPRESSION IDIOMATIC)

"Fácil: mamão com açúcar"
"EASY: PIECE OF CAKE"

@teacherandreabelo

APOSTA ESTRATÉGICA

A ideia desta seção é apresentar os pontos do conteúdo que mais possuem chances de serem cobrados em prova, considerando o histórico de questões da banca em provas de nível semelhante à nossa.

Todos os tópicos abordados nesta aula se referem a pontos que serão abordados em aulas posteriores, portanto não haverá uma aposta estratégica específica nesta aula, que será devidamente indicada em aulas futuras dentro de cada assunto específico.

Grande abraço e bons estudos!

(Osho)

QUESTÕES ESTRATÉGICAS

1. (QUADRIX - 2024 - Assistente de Tecnologia da Informação (CRT 1))

Text for the item.

ASIMO traveled to Edinburgh, Scotland, for the annual Edinburgh International Science Festival. The festival takes place in February every year. Thousands of people came to visit the festival, but most of them came to see ASIMO. ASIMO is very famous because ASIMO is a robot. It is designed to run, climb stairs, and kick a soccer ball. It can even conduct an orchestra. In fact, when Yo Yo Ma, the famous cellist, performed at a concert in Detroit, Michigan, ASIMO was the conductor. Everyone at the concert was amazed not only by Yo Yo Ma, but also by ASIMO. A robot is not a new idea. Scientists developed robots more than 60 years ago. For many years, robots have worked in factories. They do uninteresting jobs, such as packaging food or assembling cars. They are often used to do dangerous work as well. Most of these robots are shaped like machines; they do not look like people. However, ASIMO looks like a person. In addition, it is equipped with the ability to recognize and remember people.

Internet: <www.eltngl.com> (with adaptations).

Concerning the text, judge the item from. The science festival happens once a year in Edinburgh.

C) Certo

E) Errado

Comentários

A afirmativa "The science festival happens once a year in Edinburgh" é Certo.

O texto afirma claramente que o Edinburgh International Science Festival ocorre em fevereiro de cada ano, o que confirma que o festival é um evento anual. Portanto, a afirmação está correta.

Gabarito Certo

2. (QUADRIX - 2024 - Assistente de Tecnologia da Informação (CRT 1))

Concerning the text, judge the item from.

The date of the festival is not mentioned in the text.

C) Certo

E) Errado

Comentários:

A afirmativa "The date of the festival is not mentioned in the text" é Errado.

O texto afirma que o Edinburgh International Science Festival acontece em fevereiro de cada ano. Portanto, a data do festival está claramente mencionada no texto, tornando a afirmação incorreta.

Gabarito Errado

3. (QUADRIX - 2024 - Assistente de Tecnologia da Informação (CRT 1))

Text for the item.

ASIMO traveled to Edinburgh, Scotland, for the annual Edinburgh International Science Festival. The festival takes place in February every year. Thousands of people came to visit the festival, but most of them came to see ASIMO. ASIMO is very famous because ASIMO is a robot. It is designed to run, climb stairs, and kick a soccer ball. It can even conduct an orchestra. In fact, when Yo Yo Ma, the famous cellist, performed at a concert in Detroit, Michigan, ASIMO was the conductor. Everyone at the concert was amazed not only by Yo Yo Ma, but also by ASIMO. A robot is not a new idea. Scientists developed robots more than 60 years ago. For many years, robots have worked in factories. They do uninteresting jobs, such as packaging food or assembling cars. They are often used to do dangerous work as well. Most of these robots are shaped like machines; they do not look like people. However, ASIMO looks like a person. In addition, it is equipped with the ability to recognize and remember people.

Internet: <www.eltngl.com> (with adaptations).

Concerning the text, judge the item from. Everyone goes to the festival only to see ASIMO.

C) Certo

E) Errado

Comentários:

A afirmativa "Everyone goes to the festival only to see ASIMO" é Errada.

O texto menciona que "milhares de pessoas vieram visitar o festival, mas a maioria delas veio ver o ASIMO", o que implica que, embora muitos visitantes estejam interessados em ASIMO, não é correto afirmar que todos vão ao festival apenas para vê-lo. Portanto, a interpretação de que todos têm o mesmo motivo para comparecer ao evento não está de acordo com a informação apresentada.

Gabarito Errado

4. (CESPE (CEBRASPE) - Prefeitura Municipal de Camaçari (BA) - Professor de Língua Inglesa (Pref Camaçari/BA))

Considering the definitions of skimming and scanning, choose the correct option.

- A) Scanning is a method for intensive reading of a text.
- B) Scanning is a strategy used to find specific pieces of information in a text.
- C) Skimming and scanning are different terms for the same practice.
- D) Scanning is related to a deep understanding of a text.
- E) Skimming is a method used for long slow reading of texts.

Comentários:

The correct option is:

- B) Scanning is a strategy used to find specific pieces of information in a text.

Explicação das demais opções:

- A) Incorreto. Scanning não é um método de leitura intensiva; na verdade, é uma busca rápida por informações específicas.
- C) Incorreto. Skimming e scanning são estratégias de leitura distintas; skimming envolve obter rapidamente a ideia principal, enquanto scanning foca na localização de detalhes específicos.
- D) Incorreto. Scanning não está relacionado a uma compreensão profunda; trata-se de encontrar informações específicas rapidamente, sem precisar entender todo o texto.
- E) Incorreto. Skimming não é um método de leitura longa e lenta; é uma técnica de leitura rápida para compreender as ideias principais.

Gabarito Letra B

5. (2022 - IBFC - Tribunal de Justiça de Minas Gerais - Analista Judiciário - Analista de Tecnologia da Informação (TJ MG))

Crimes

Certain types of people cannot be charged with committing a crime. It may appear that they have committed a crime. However, for a variety of reasons their behavior will not be considered a crime in the courts of law. First, insane people cannot commit a crime. These people do not understand their behavior. They may not understand right from wrong. Next, those taking drugs prescribed by a doctor might be excused from committing a crime. If the drugs affect their minds, the court will excuse them. Finally, children under a certain age cannot be held responsible for committing a crime.

A partir das técnicas de leitura instrumental, atenha-se à compreensão e à interpretação do texto "Crimes", analise as afirmativas a seguir e dê valores de Verdadeiro (V) e Falso (F).

- () O autor afirma que certos tipos de indivíduos não podem ser acusados de cometer um crime.
- () O autor expõe que todos os indivíduos com comportamentos criminosos poderão ser julgados nos tribunais.
- () Ainda segundo o autor, os indivíduos mentalmente insanos não podem ser acusados de cometer um crime.
- () O autor reitera que embora insanos, os indivíduos conseguem entender e avaliar o seu próprio comportamento.

Assinale a alternativa que apresenta a sequência correta de cima para baixo.

- A) F - V - F - V
- B) V - F - V - F
- C) F - F - V - V
- D) V - V - F - F
- E) V - V - V - V

Comentários:

(V) O autor afirma que certos tipos de indivíduos não podem ser acusados de cometer um crime. Essa afirmativa é verdadeira, pois o texto menciona que certos tipos de pessoas, como as mentalmente insanas, não podem ser acusados de cometer crimes.

(F) O autor expõe que todos os indivíduos com comportamentos criminosos poderão ser julgados nos tribunais.

Essa afirmativa é falsa, já que o texto deixa claro que nem todos os comportamentos são considerados crime, especialmente os de pessoas insanas, crianças abaixo de uma certa idade e aqueles sob efeito de medicamentos.

(V) Ainda segundo o autor, os indivíduos mentalmente insanos não podem ser acusados de cometer um crime.

Essa afirmativa é verdadeira, conforme mencionado no texto, que especifica que pessoas insanas não compreendem seu comportamento e, portanto, não podem ser responsabilizadas.

(F) O autor reitera que embora insanos, os indivíduos conseguem entender e avaliar o seu próprio comportamento.

Essa afirmativa é falsa, pois o texto afirma que indivíduos insanos não entendem seu comportamento, o que os isenta de responsabilidade criminal.

Portanto, a sequência correta de valores para as afirmativas é: V - F - V - F.

Gabarito Letra B

6. (2021 - CESPE (CEBRASPE) - Polícia Rodoviária Federal

Policial Rodoviário Federal (PRF))

A deep freeze this week in the Lone Star state, which relies on electricity to heat many homes, is causing power demand to skyrocket. At the same time, natural gas, coal, wind and nuclear facilities in Texas have been knocked offline by the unthinkable low temperatures

"The extreme cold is causing the entire system to freeze up," said Jason Bordoff, director of Columbia University's Center on Global Energy Policy. "All sources of energy are underperforming in the extreme cold because they're not designed to handle these unusual conditions."

The ripple effects are being felt around the nation as Texas' prolific oil-and-gas industry stumbles.

It's striking that these power outages are happening in a state with abundant energy resources. Texas produces more electricity than any other US state — generating almost twice as much as Florida, the next-closest, according to federal statistics.

Wind power is also booming in Texas, which produced about 28% of all the US wind-powered electricity in 2019, the EIA said. But the problem is that not only is Texas an energy superpower, it tends to be an above-average temperature state. That means its infrastructure is ill-prepared for the cold spell currently wreaking havoc. And the consequences are being felt by millions.

Critics of renewable energy have pointed out that winds turbines have frozen or needed to be shut down due to the extreme weather.

Even though other places with colder weather (like Iowa and Denmark) rely on wind for even larger shares of power, experts said the turbines in Texas were not winterized for the unexpected freeze.

But this is not just about wind turbines going down. Natural gas and coal-fired power plants need water to stay online. Yet those water facilities froze in the cold temperatures and others lost access to the electricity they require to operate.

It's too early to definitively say what went wrong in Texas and how to prevent similar outages. More information will need to be released by state authorities. Still, some experts say the criticism of wind power appears overdone already. "In terms of the blame game, the focus on wind is a red herring. It's more of a political issue than what is causing the power problems on the grid," said Dan Cohan, associate professor of environmental engineering at Rice University.

The energy crisis in Texas raises also questions about the nature of the state's deregulated and decentralized electric grid. Unlike other states, Texas has made a conscious decision to isolate its grid from the rest of the country.

That means that when things are running smoothly, Texas can't export excess power to neighboring states. And in the current crisis, it can't import power either.

Internet www.can.com (adapte)

About ideas stated in the text above and the words used in it, judge the following item.

The text points to the lack of wind as the primary cause for a dip in the production of wind energy during the period described.

C) Certo.

E) Errado.

Comentários:

A afirmativa "The text points to the lack of wind as the primary cause for a dip in the production of wind energy during the period described" é Errado.

Comentário: O texto menciona que as turbinas eólicas congelaram ou precisaram ser desligadas devido ao clima extremo, mas não atribui a queda na produção de energia eólica à falta de vento. Na verdade, o problema está relacionado à falta de preparação das infraestruturas para lidar com temperaturas extremamente baixas. O autor também observa que, apesar de outros lugares com climas mais frios dependerem de energia eólica, as turbinas do Texas não estavam adequadamente preparadas para o congelamento inesperado. Portanto, a causa do problema não é a falta de vento, mas sim as condições climáticas extremas que afetaram o funcionamento de várias fontes de energia, incluindo as turbinas eólicas.

Gabarito Errado

7. (2024 - CESGRANRIO - Caixa Econômica Federal - Técnico Bancário Novo (CEF))

The new cost of living in New Mexico

1. ALBUQUERQUE, N.M. — Prices are going up in New Mexico, especially at the grocery store. A recent study found the average New Mexican family is spending up to \$286 on groceries per week – and even more when children are involved.

2. According to the U.S. Bureau of Labor Statistics, the average price for a pound of ground beef was \$5.56 last month. That’s about 20 cents cheaper than back in July, but almost a full dollar more expensive than in January 2020 – right before the pandemic hit. It’s a similar trend for milk, but a gallon is only about 50 cents more expensive than four years ago.

3. Eggs are half the price of what they were last winter, but that’s because there was an avian flu outbreak. Most produce items, like tomatoes and bananas, have stayed around the same price for several years now. That’s probably a good thing, because snacks are getting more expensive. Data shows the average bag of potato chips is almost \$2 more expensive than four years ago. The price of chocolate chip cookies is also up almost 40%. All of those small increments add up.

4. While it’s not likely there will be a major drop in grocery prices soon, there is some potentially good news when it comes to your housing budget. Officials with the Apartment Association of New Mexico say there are at least 40 housing projects under construction in the Albuquerque area. That is expected to bring at least 5,000 rental units to the market in the coming months. State leaders are pitching in too, with several new bills opening up millions of dollars in funding for even more housing projects. The average rent in Albuquerque is sitting at \$1,340 a month – about \$400 higher than in January 2020. Economists suggest an increased housing supply could reduce prices for everyone.

5. There is also evidence that wage growth is happening. Data from the U.S. Bureau of Labor Statistics showed average hourly earnings increased by 1.4% since last January. It’s worth noting wage growth rates have surpassed inflation rates since last February.

Available at: <<https://www.kob.com/new-mexico/the-new-cost-of--living-in-new-mexico/>>.
Retrieved on: Mar 1, 2024. Adapted.

The excerpt of paragraph 5 “wage growth rates have surpassed inflation rates since last February” informs that

- A) inflation rates have enlarged people’s income.
- B) inflation rates are lower now than last February.
- C) salaries have increased beyond inflation.
- D) salaries have reduced because of inflation.
- E) salaries have been considerably affected by inflation.

Comentários:

O trecho do parágrafo 5, "wage growth rates have surpassed inflation rates since last February," indica que:

C) salários aumentaram além da inflação.

Isso significa que o crescimento dos salários tem sido maior do que a taxa de inflação desde o fevereiro passado. Portanto, embora os preços estejam subindo, o aumento salarial tem compensado essas elevações, resultando em um poder de compra melhor para os trabalhadores em comparação com o aumento da inflação.

Gabarito Letra C

8. (2024 - CESGRANRIO - Caixa Econômica Federal - Técnico Bancário Novo (CEF))

The new cost of living in New Mexico

1 ALBUQUERQUE, N.M. — Prices are going up in New Mexico, especially at the grocery store. A recent study found the average New Mexican family is spending up to \$286 on groceries per week – and even more when children are involved.

2 According to the U.S. Bureau of Labor Statistics, the average price for a pound of ground beef was \$5.56 last month. That's about 20 cents cheaper than back in July, but almost a full dollar more expensive than in January 2020 – right before the pandemic hit. It's a similar trend for milk, but a gallon is only about 50 cents more expensive than four years ago.

3 Eggs are half the price of what they were last winter, but that's because there was an avian flu outbreak. Most produce items, like tomatoes and bananas, have stayed around the same price for several years now. That's probably a good thing, because snacks are getting more expensive. Data shows the average bag of potato chips is almost \$2 more expensive than four years ago. The price of chocolate chip cookies is also up almost 40%. All of those small increments add up.

4 While it's not likely there will be a major drop in grocery prices soon, there is some potentially good news when it comes to your housing budget. Officials with the Apartment Association of New Mexico say there are at least 40 housing projects under construction in the Albuquerque area. That is expected to bring at least 5,000 rental units to the market in the coming months. State leaders are pitching in too, with several new bills opening up millions of dollars in funding for even more housing projects. 5 There is also evidence that wage growth is happening. Data from the U.S. Bureau of Labor Statistics showed average hourly earnings increased by 1.4% since last January. It's worth noting wage growth rates have surpassed inflation rates since last February.

Available at: <<https://www.kob.com/new-mexico/the-new-cost-of--living-in-new-mexico/>>. Retrieved on: Mar 1, 2024. Adapted.

In paragraph 4, the section “there are at least 40 housing projects under construction” means that new residential units

- A) have just been finished.
- B) are currently being built.
- C) might eventually be built.
- D) couldn't be finished.
- E) are temporarily suspended.

Comentários:

No parágrafo 4, a seção “there are at least 40 housing projects under construction” significa que novas unidades residenciais

B) are currently being built. - “(B) estão atualmente sendo construídas.)”

Isso indica que os projetos habitacionais estão em andamento e ainda não foram concluídos. A frase sugere que o mercado imobiliário está ativo e em expansão, com novas construções ocorrendo para aumentar a oferta de unidades habitacionais.

Gabarito Letra B

9. (2024 - CESPE (CEBRASPE) - Ministério do Planejamento e Orçamento - Analista de Planejamento e Orçamento - Especialidade Geral (MPO))

The Scottish government's forestry agency is aiming to grow and nurture millions of saplings indoors before transferring them to the wild. It's not alone in its ambition to re-green its land; countries, companies, and non-profits around the world have been pledging to plant millions or even billions of trees as a way to combat climate change. Ethiopia set a record when it planted an estimated 350 million trees in one day in 2019.

When it comes to planting trees, though, simply scattering millions of seeds isn't going to do the trick, as there are all sorts of factors that can prevent a seed from germinating and growing into a full-fledged tree. Hence the strategy Forestry and Land Scotland (FLS) wants to use: plant saplings, not seeds, and crank those saplings out faster than nature could. In the wild, it would take about 18 months to grow a tree seedling 40 to 50 millimeters, while in a vertical farm it can take as little as 90 days.

Not just any vertical farm, though. The technology for the FLS initiative is coming from an Edinburgh-based company called Intelligent Growth Solutions (IGS), which makes modular, scalable vertical farming systems it calls Growth Towers. FLS has grown several batches of

vertically-farmed saplings as a proof of concept, which are now maturing in open-air nurseries before being transferred to their permanent home in the Scottish Highlands.

In 2019 the United Kingdom (UK) government pledged to plant 30,000 hectares (115.8 square miles) of new forests by the end of 2024, but they're looking unlikely to meet that target. Nevertheless, after thousands of years of decimating forests, it's now possible for us to become the first generation of humans that expands them. However, it's going to take some serious strategizing, dedication, and technology; and it seems vertical farming could be a valuable ingredient in the recipe for global re-forestation.

Internet: <singularityhub.com>(adapted).

According to the previous text, judge the following item.

Vertical farms enable saplings to grow 40 to 50 millimeters in much less than half the time they would need to grow that same length in the wild.

- C) Certo.
- E) Errado.

Comentários:

- C) Certo.

De acordo com o texto, a tecnologia utilizada nas fazendas verticais permite que as mudas cresçam 40 a 50 milímetros em apenas 90 dias, enquanto na natureza levaria cerca de 18 meses para atingir o mesmo tamanho. Portanto, vertical farms realmente permitem que as mudas cresçam essa altura em menos da metade do tempo necessário na natureza.

Gabarito: Certo

10. (2024 - CESPE (CEBRASPE) - Ministério do Planejamento e Orçamento - Analista de Planejamento e Orçamento - Especialidade Geral (MPO))

However, it's going to take some serious strategizing, dedication, and technology; and it seems vertical farming could be a valuable ingredient in the recipe for global re-forestation.

Internet:<singularityhub.com>(adapted).

According to the previous text, judge the following item.

Dispersing seeds is enough to avoid the issues related to the process of becoming a completely developed tree.

- C) Certo.
- E) Errado.

Comentários:

- E) Errado.

O texto menciona que simplesmente dispersar milhões de sementes não é suficiente para garantir que elas germinem e se desenvolvam em árvores maduras. Existem vários fatores que podem impedir que uma semente germina e cresça adequadamente. Por isso, a estratégia da Forestry and Land Scotland (FLS) é plantar mudas já em desenvolvimento, em vez de sementes, para acelerar o crescimento e garantir melhores resultados. Portanto, a afirmação de que dispersar sementes é suficiente para evitar problemas no processo de desenvolvimento completo de uma árvore está incorreta.

Gabarito Errado

QUESTIONÁRIO DE REVISÃO E APERFEIÇOAMENTO

Nesta seção, apresentamos e comentamos uma amostra de questões objetivas selecionadas estrategicamente: são questões com nível de dificuldade semelhante ao que você deve esperar para a sua prova e que, em conjunto, abordam os principais pontos do assunto.

A ideia, aqui, não é que você fixe o conteúdo por meio de uma bateria extensa de questões, mas que você faça uma boa revisão global do assunto a partir de, relativamente, poucas questões.

Perguntas

- 1 - Quais são as técnicas utilizadas no Skimming e Scanning?
- 2 - Traduza corretamente os False Cognates ou False Friends, a seguir: ACTUALLY, FABRIC, PREJUDICE, COLLEGE e PRETEND.
- 3 - Traduza a expressão idiomática "we are even".
- 4 - Traduza a expressão idiomática "Maybe some other time".
- 5 - Traduza a expressão idiomática "It's a catch 22".
- 6 - Traduza a expressão idiomática "When hell freezes over".
- 7 - Traduza a expressão idiomática "Easy: Piece of cake".
- 8 - Traduza a expressão idiomática "Between a rock and a hard place."
- 9 - Traduza a expressão idiomática "Once and for all".
- 10 - Traduza a expressão idiomática "A word to the wise is enough".

Perguntas com respostas

1 - Quais são as técnicas utilizadas no Skimming e Scanning?

R: São técnicas utilizadas no Skimming e Scanning:

SKIMMING	SCANNING
<ul style="list-style-type: none">• FAST READING• CONCENTRATION/FOCUS• GENERAL TEXT IDEA• TEXT GOALS• SUBJECT INFORMATION	<ul style="list-style-type: none">• VOCABULARY SELECTIVITY• KEEP AN EYE ON THE TEXT• COGNATS: HELPERS• SPECIFIC DETAILS• VISUAL CONTACT

2 - Traduza corretamente os False Cognates ou False Friends, a seguir: ACTUALLY, FABRIC, PREJUDICE, COLLEGE e PRETEND.

R: A seguir a tradução questionada:

- ACTUALLY = de fato/na verdade (não é atualmente, que seria NOWADAYS)
- FABRIC = tecido (não é fábrica, que seria FACTORY)
- PREJUDICE = preconceito (não é prejudicial, que seria HARMFUL)
- COLLEGE = faculdade (não é escola, que seria SCHOOL)
- PRETEND = fingir (não é pretender, que seria TO INTEND)

3 - Traduza a expressão idiomática "we are even".

R: Tradução: Estamos Quites.

4 - Traduza a expressão idiomática "Maybe some other time".

R: Tradução: Fica para a próxima.

5 - Traduza a expressão idiomática "It's a catch 22".

R: Tradução: Beco sem saída.

6 - Traduza a expressão idiomática "When hell freezes over".

R: Tradução: No dia de São Nunca.

7 - Traduza a expressão idiomática "Easy: Piece of cake".

R: Tradução: Fácil: Mamão com açúcar".

8 - Traduza a expressão idiomática "Between a rock and a hard place."

R: Tradução: Entre a cruz e a espada.

9 - Traduza a expressão idiomática "Once and for all".

R: Tradução: De uma vez por todas.

10 - Traduza a expressão idiomática "A word to the wise is enough".

R: Tradução: Para um bom entendedor, meia palavra basta.

LISTA DE QUESTÕES ESTRATÉGICAS

01. (FGV/2022 – RECEITA FEDERAL)

Global commerce

Driverless vehicles whizz across five new berths at Tuas Mega Port, which sits on a swathe of largely reclaimed land at the western tip of Singapore. Unmanned cranes loom overhead, circled by camera-fitted drones. The berths are the first of 21 due by 2027. When it is completed in 2040, the complex will be the largest container port on Earth, boasts PSA International, its Singaporean owner. Tuas is a vision of the future on two fronts. It illustrates how port operators the world over are deploying clever technologies to meet the demand for their services in the face of obstacles to the development of new facilities, from lack of space to environmental concerns. More fundamentally, the city-state's investment, with construction costs estimated at \$15bn, is part of a wave of huge bets by the broader logistics industry on the rising importance of Asia, and South-East Asia in particular. The IMF expects the region's five largest economies—Indonesia, Malaysia, Singapore, the Philippines and Thailand—to be the fastest-growing bloc in the world by trade volumes between 2022 and 2027. The result is that the map of global commerce and the blueprints for its critical nodes are being simultaneously redrawn.

From: The Economist, January 14, 2023, pp. 57-58

01. The sentence "Driverless vehicles whizz across" (1st paragraph) introduces a sense of

- (A) speed.
- (B) height.
- (C) weight.
- (D) depth.
- (E) size.

02. (FGV/2022 – RECEITA FEDERAL) The word "swathe" (1st paragraph) can also be used elsewhere in the relation to

- (A) lather.
- (B) cloth.
- (C) foam.
- (D) tide.
- (E) fire.

03. (FGV/2022 – RECEITA FEDERAL)

Adding ethics to public finance

Evolutionary moral psychologists point the way to garnering broader support for fiscal policies

Policy decisions on taxation and public expenditures intrinsically reflect moral choices. How much of your hard-earned money is it fair for the state to collect through taxes? Should the rich pay more? Should the state provide basic public services such as education and health care for free to all citizens? And so on.

Economists and public finance practitioners have traditionally focused on economic efficiency. When considering distributional issues, they have generally steered clear of moral considerations, perhaps fearing these could be seen as subjective. However, recent work by evolutionary moral psychologists suggests that policies can be better designed and muster broader support if policymakers consider the full range of moral perspectives on public finance. A few pioneering empirical applications of this approach in the field of economics have shown promise.

For the most part, economists have customarily analyzed redistribution in a way that requires users to provide their own preferences with regard to inequality: Tell economists how much you care about inequality, and they can tell you how much redistribution is appropriate through the tax and benefit system. People (or families or households) have usually been considered as individuals, and the only relevant characteristics for these exercises have been their incomes, wealth, or spending potential.

There are two — understandable but not fully satisfactory — reasons for this approach. First, economists often wish to be viewed as objective social scientists. Second, most public finance scholars have been educated in a tradition steeped in values of societies that are WEIRD (Western, Educated, Industrialized, Rich, and Democratic). In this context, individuals are at the center of the analysis, and morality is fundamentally about the golden rule — treat other people the way that you would want them to treat you, regardless of who those people are. These are crucial but ultimately insufficient perspectives on how humans make moral choices.

Evolutionary moral psychologists during the past couple of decades have shown that, faced with a moral dilemma, humans decide quickly what seems right or wrong based on instinct and later justify their decision through more deliberate reasoning. Based on evidence presented by these researchers, our instincts in the moral domain evolved as a way of fostering cooperation within a group, to help ensure survival. This modern perspective harks back to two moral philosophers of the Scottish Enlightenment — David Hume and Adam Smith — who noted that sentiments are integral to people's views on right and wrong. But most later philosophers in the Western tradition sought to base morality on reason alone.

Moral psychologists have recently shown that many people draw on moral perspectives that go well beyond the golden rule. Community, authority, divinity, purity, loyalty, and sanctity are important considerations not only in many non-Western countries, but also among politically influential segments of the population in advanced economies, as emphasized by proponents of moral foundations theory.

Regardless of whether one agrees with those broader moral perspectives, familiarity with them makes it easier to understand the underlying motivations for various groups' positions in debates on public policies. Such understanding may help in the design of policies that can muster support from a wide range of groups with differing moral values.

The adjective in "is it fair for the state to collect through taxes" (1st paragraph) is equivalent in meaning to

- (A) bewildering.
- (B) befuddling.
- (C) bemusing.
- (D) beguiling.
- (E) befitting.

04. (FGV/2022 – RECEITA FEDERAL)

Based on the text, mark the statements below as TRUE (T) or FALSE (F).

I. The planning of fiscal strategies is impervious to moral considerations.

II. Traditional public finance education based on the golden rule is wanting as regards moral choices.

III. Since the 18th century, philosophers have been on the same page as regards moral dilemmas. The statements are, respectively,

- (A) T – F – T.
- (B) F – F – T.
- (C) F – T – F.
- (D) F – T – T.
- (E) T – F – F.

05. (CEBRASPE/2022 – TRT – 8ª Região [PA e AP])

The European Commission has publicized new liability rules on digital products and artificial intelligence (AI) in order to protect consumers from harm, including in cases where cybersecurity vulnerabilities fail to be addressed. The two proposals the Commission adopted on September 28th, 2022 will modernize the existing rules on the strict liability of manufacturers for defective products, from smart technology to pharmaceuticals.

Additionally, the Commission proposes – for the first time, it says – a targeted harmonization of national liability rules for AI, making it easier for victims of AI-related damage to get compensation. This will be adopted in line with the Commission's 2021 AI Act proposal. The liability rules allow compensation for damages when products like robots, drones or smart-home

systems are made unsafe by software updates, AI or digital services that are needed to operate the product, as well as when manufacturers fail to address cybersecurity vulnerabilities.

Explaining how the new rules shift the focus in such litigations, John Buyers, head of AI at Osborne Clarke, said "there is a very intentional interplay between the AI Act and the proposed new presumptions on liability, linking non-compliance with the EU's planned regulatory regime with increased exposure to damages actions. Instead of having to prove that the AI system caused the harm suffered, claimants who can prove noncompliance with the Act (or certain other regulatory requirements) will benefit from a presumption that their damages case is proven. The focus will then shift to the defendant to show that its system is not the cause of the harm suffered."

However, one challenge Buyers points out is the need for claimants to get hold of the defendant's regulatory compliance documentation to inform their claims. In addition, Buyers said that the AI Act is not expected to become law before late 2023, with a period for compliance after that — which will likely be 2 years, but this is still being debated.

Internet: (adapted).

According to text, it is correct to infer that

- (A) it is the first time the European Commission has publicized liability rules on digital products and AI.
- (B) the new liability rules also encompass products which are not digital or AI-related.
- (C) the rules on the liability of manufacturers for faulty goods are possibly not lenient.
- (D) the European Commission has come up with a proposal to compensate consumers who damaged their products themselves.
- (E) the compensation proposed by the European Commission only applies to the products which came with a manufacturing defect.

06. (CEBRASPE/2022 – TRT – 8ª Região [PA e AP]) It can be inferred from the third paragraph of text that

- (A) consumers will have a hard time proving that the AI system caused harm to the product they had previously bought.
- (B) claimants will be granted compensation for any reason.
- (C) consumers will not be compensated unless they can prove that it was the AI system that caused the harm suffered.
- (D) claimants will now have to prove both that there was an AI-related problem with their products and that the defendant failed to comply with the AI Act.
- (E) the new rules will make it possible for claimants to get compensation even if they do not directly prove that the AI system caused the harm suffered.

07. (CEBRASPE/2022 – TRT – 8ª Região [PA e AP])

As technology advances, the car industry has developed new ways to improve user experience. One of these ways includes using artificial intelligence to make cars self driving. A self-driving car (also known as an autonomous car or driverless car) is a vehicle that uses a different number of sensors, radars, cameras, and artificial intelligence to travel to destinations without needing a

human driver. Many companies have already started to manufacture self-driving cars, which are put through many tests to ensure they are eligible to be on the road without making any errors. To qualify as fully autonomous, a car must navigate routes to predetermined destinations without any human intervention.

Artificial intelligence powers self-driving vehicle frameworks. Self-driving vehicle engineers utilize a great deal of information from image recognition systems, AI and neural networks to assemble frameworks that can drive self-sufficiently. The neural networks distinguish patterns in the data, which is fed to the AI calculations. That data include images from cameras for self-driving vehicles. The neural networks figure out how to recognize traffic lights, trees, pedestrians, road signs, and different parts of any random driving environment.

As an example, Google has started to develop self-driving cars, which use a mix of sensors, light detectors, and other technology, like GPS and cameras. All the input data are combined and the artificial system predicts what those objects might do next. This whole process happens in a matter of milliseconds. Similar to any human driver, the more experience these systems gain, the better they become at driving. The more data it deals with in its deep learning algorithms, the more choices it will make and the faster those choices will be.

Internet: (adapted).

From the excerpt "The more data it deals with in its deep learning algorithms, the more choices it will make and the faster those choices will be" (last paragraph of text), it can be concluded that

- (A) if a self-driving car deals with more data in its deep learning algorithms, it will make more but slower choices.
- (B) the speed at which self-driving cars make choices is mostly affected by the number of dates on which these vehicles are put to use.
- (C) the large amount of data available in deep learning algorithms can undermine the quality of the choices made by self-driving cars.
- (D) self-driving cars will have more data in its deep learning algorithms if they make faster choices.
- (E) the technology in self-driving cars will make more and faster choices as it deals with more data in its deep learning algorithms.

08. (BANCA/ANO – INSTITUIÇÃO) The main purpose of the second paragraph of text is to explain

- (A) why AI is important to make autonomous cars more powerful.
- (B) how self-driving cars work through artificial intelligence.
- (C) how AI helps to recognize elements like traffic signs, trees, and any other random changes in the driving environment.
- (D) what kinds of networks are used to feed the AI calculations.
- (E) how crucial images captured by cameras are for autonomous vehicles.

09. (IBFC/2022 – TJ-MG)

Crimes

Certain types of people cannot be charged with committing a crime. It may appear that they have committed a crime. However, for a variety of reasons their behavior will not be considered a crime in the courts of law. First, insane people cannot commit a crime. These people do not understand their behavior. They may not understand right from wrong. Next, those taking drugs prescribed by a doctor might be excused from committing a crime. If the drugs affect their minds, the court will excuse them. Finally, children under a certain age cannot be held responsible for committing a crime. Utilizando-se das técnicas de leitura instrumental, mais especificamente da técnica skimming, ou seja, uma leitura rápida e superficial, leia o texto "Crimes" e assinale a alternativa que realmente identifica o assunto geral tratado pelo autor do texto.

- (A) O autor discute os crimes de uma maneira geral e superficial.
- (B) O autor afirma que todos os indivíduos são criminosos.
- (C) O autor expõe que os indivíduos mentalmente insanos não são capazes de cometer crimes.
- (D) O autor declara que alguns indivíduos não podem ser acusados de cometer crimes.
- (E) O autor remonta casos de crimes e as complicações legais dos criminosos.

10. (IBFC/2022 – TJ-MG) Utilizando-se das técnicas de leitura instrumental, especificamente da técnica scanning, a qual consiste em uma leitura atenta e precisa.

Analise o excerto a seguir:

"They may not understand right from wrong".

Assinale, dentre as alternativas abaixo, a que está mais próxima em significado.

- (A) Eles talvez não compreendam o que é certo.
- (B) Eles talvez não consigam compreender o que é errado.
- (C) Eles não conseguem distinguir o certo do errado.
- (D) Eles não conseguem entender que só devem fazer o certo.
- (E) Eles podem compreender o que é certo e o que é errado, mas não têm essa vontade.

ESSA LEI TODO MUNDO CONHECE: PIRATARIA É CRIME.

Mas é sempre bom revisar o porquê e como você pode ser prejudicado com essa prática.

1

Professor investe seu tempo para elaborar os cursos e o site os coloca à venda.

2

Pirata divulga ilicitamente (grupos de rateio), utilizando-se do anonimato, nomes falsos ou laranjas (geralmente o pirata se anuncia como formador de "grupos solidários" de rateio que não visam lucro).

3

Pirata cria alunos fake praticando falsidade ideológica, comprando cursos do site em nome de pessoas aleatórias (usando nome, CPF, endereço e telefone de terceiros sem autorização).

4

Pirata compra, muitas vezes, clonando cartões de crédito (por vezes o sistema anti-fraude não consegue identificar o golpe a tempo).

5

Pirata fere os Termos de Uso, adultera as aulas e retira a identificação dos arquivos PDF (justamente porque a atividade é ilegal e ele não quer que seus fakes sejam identificados).

6

Pirata revende as aulas protegidas por direitos autorais, praticando concorrência desleal e em flagrante desrespeito à Lei de Direitos Autorais (Lei 9.610/98).

7

Concurseiro(a) desinformado participa de rateio, achando que nada disso está acontecendo e esperando se tornar servidor público para exigir o cumprimento das leis.

8

O professor que elaborou o curso não ganha nada, o site não recebe nada, e a pessoa que praticou todos os ilícitos anteriores (pirata) fica com o lucro.

Deixando de lado esse mar de sujeira, aproveitamos para agradecer a todos que adquirem os cursos honestamente e permitem que o site continue existindo.
